TECHNICAL SKILLS

FRONTEND

JavaScript, TypeScript, React, Next.js, Angular, HTML, CSS, SCSS

UI ENGINEERING

Tailwind CSS, shadcn/ui, reusable components, accessibility basics, Figma

DATA & FORMS

REST APIs, TanStack Query, Zustand, React Hook Form, Zod

QUALITY & DELIVERY

Vitest, React Testing Library, Git, Vercel

EDUCATION

Igor Sikorsky Kyiv Polytechnic Institute
B.Sc. Production Automation & Computer-Integrated Technologies
2021 – 2025

LANGUAGES

Ukrainian — Native
Russian — Fluent
English — B2 (developing)

PROFILE

Frontend developer focused on responsive web applications with React, Next.js and TypeScript. I turn Figma designs into reusable components, integrate APIs and test user-facing features. Over the past several years I've worked on frontend projects alongside intensive project-based 3D and motion design work, including lead responsibilities — a background that sharpens my eye for visual quality and interaction.

RELEVANT PROFESSIONAL EXPERIENCE

Frontend Developer | Freelance / Project-based

2024 – 2026 · React · Next.js · TypeScript · Angular · Tailwind CSS

- Delivered frontend work across commercial and freelance projects — turned Figma designs into responsive pages and reusable components with React, Next.js, TypeScript and Angular.
- Built account, search and data-heavy interfaces with REST API integration (TanStack Query, Zustand), including forms, validation and error states; tested with Vitest and React Testing Library.

Junior Frontend Developer | Confidential company (NDA)

2023 – 2024 · React · Next.js · TypeScript · SCSS · REST API

- Implemented Figma-based page sections and UI components, adjusting spacing, typography and layouts for desktop and mobile.
- Connected REST endpoints to forms and account screens with proper loading, validation and error states; fixed UI bugs from code review and verified responsive behavior.

PERSONAL PROJECTS

Healthy Delivery

Website for a healthy meal-delivery service

Built a responsive service website that helps visitors explore ready-made meal plans by calorie level, read food articles and browse the built-in Gastro Shop. Implemented the calorie-based meal-plan selector, reusable article cards and a product section with consistent layout and interaction patterns.

Stack Next.js, TypeScript, Tailwind CSS, React

Epoxy Table Studio

Epoxy table storefront with an online configurator

Created a responsive catalog and a table configurator for dimensions, wood, resin color and leg options. Connected the configuration to a live price estimate and an inquiry form, with shareable configuration links.

Stack Next.js, TypeScript, Tailwind CSS, Zustand, React Hook Form, Zod

MEPIT Project

Landing page concept for a military technology startup

Delivered a pixel-perfect implementation of the Figma design, matching typography, spacing, colors and image positioning. Refined responsive layouts across desktop and mobile, added a contact form and deployed the site on Vercel.

Stack Next.js, TypeScript, Tailwind CSS 4, React Hook Form, Zod, Vercel
